

Ricky Linex from Native Plants Society of Texas retired in 2021 as a wildlife biologist for the Natural Resources Conservation Service (NRCS) and currently works as a range and wildlife consultant. Ricky worked 51 counties in north central Texas with NRCS covering the Rolling Plains, Cross Timbers, Blackland Prairie and Post Oak Savannah vegetational regions. He is the author of "Range Plants of North Central Texas, A Land Users Guide to Their Identification, Value and Management", a plant identification book for Texas. Range Plants was recognized in 2015 as an outstanding publication by the Texas Chapter-The Wildlife Society, the Native Plant Society of Texas and the Texas Section-Society for Range Management. Copies of this book are available from Botanical Research Institute of Texas (<https://shopbritpress.org/products/range-plants>).
